Intermediate Agile Project Management
Course Outline

SPARTAN
Allied Services
Deliver Results - Create Value

Program Overview

Building on the SAS-developed "Introduction to Agile Project Management Course", this course will teach Agile Estimation and Planning in depth, how to form and develop Agile teams, how to manage stakeholders in an Agile project, Agile contracts, Agile KPIs (including Earned Value Management as used in Agile), and continuous improvement.

Group work simulate real-life scenarios that will immerse participants into breaking down story points into their smallest possible scenario; the use of Kanban or task boards along with the attendance concepts of identifying work bottlenecks using Work In Progress (WIP) charts. Etc. Seat works are given for participants to learn how to compute common Agile KPIs, etc. Monopoly rounds exercises, as well as Product Roadmap simulations will also be given.

As with all PMI accredited trainings, the course is methodology agnostic. However, discussions on how various Agile methodologies such as Scrum, DSDM, FDD, XP Programming, Crystal methodology, and etc. will be made especially when discussing how Agile practitioners customize various Agile methodologies to suit their needs.

This course is approved by the Project Management Institute (PMI), a Pennsylvania-based Organization of Project Managers. If done in succession with the "Introduction to Agile Project Management Course", this will award participants with a total of 28 PDUs. To sit for the PMI Agile Certified Practitioner (PMI-ACP©) candidates are only required 21 PDUs. Together, these 2 courses are already sufficient for the candidate to take the exam. The seven domains in the PMI-ACP exam content outline are also covered by the two courses.

PMI is a member of the American National Standards Institute (ANSI) and is therefore the de facto standards development body for the project management profession. It awards the globally recognized, and highly coveted Project Management Professional, PMP© credential. For Agile Professionals, it awards the Agile Certified Practitioner (PMI-ACP) certification. SAS Management, Inc. is a PMI Registered Education Provider (REP). This course will award 14 Professional Development Units (PDUs) which can be used to apply for any PMI credential, or to maintain their existing credential. For more information regarding applying for a PMI certification, or for maintaining your existing PMI certifications, please visit www.pmi.org.

Duration
2- Day Program

Prerequisite:

Introduction to Agile Project Management (can we waived if participants are experienced Agile practitioners)

Learning Objectives

Designed for experienced Agile Project Managers, or those who already took SAS Management, Inc.'s "Introduction to Project Management", this course will take participants in depth into the world of Agile Practice and will teach participants advanced Agile concepts such as:

1. Agile Estimation and Planning;
2. How Agile can be adapted for large projects;
3. Developing Agile Teams;

4.   Problem Detection and Resolution;

5.   Managing Agile Risks;

6.   Managing Stakeholders

7.   Customizing Agile methodologies (hybridization of Agile practice to fit your needs).

8.   Agile KPIs

Target Audience

Experienced Agile Project Managers, or those who already took the introduction course in Agile Project Management, but wants to continue their studies to more advanced concepts in Agile.

PMI-credential holders looking into expanding their knowledge in Project Management and earn some PDUs to maintain their certifications can also take this course.

PDUs to be awarded

Program	Technical	Leadership	Strategic & Business
PMP	14		
CAPM	14		
PgPM	14		
PMI-ACP	14		
PMI-RMP	14*		
PMI-SP	14*		
PfMP	14		
PMI-PBA	14*		

* Only applies to the general project management PDUs required, not to specific program requirements

Why Choose SAS Management Inc.

We Deliver Results

SAS Management Inc. has consistently proven its capability to deliver and exceed our clients' expectations. We are the only PEOPLECERT© Accredited Training Organization (ATO) in the Philippines. Our pool of consultants and trainers are seasoned industry veterans who have above average qualifications and certifications such as Business Management, Process Improvement, and Organizational Development Programs.

We Create Value

SAS Management Inc. believes in ensuring that our services meet the intended needs of our clients. To us, it is more than just providing training and consulting but rather ensuring that these are the things that our clients really need. This is why SAS Management Inc. is probably the only training provider that does a thorough needs assessment prior to providing a proposal. Our goal for every proposal is to CREATE VALUE for your organization.

SAS Management, Inc. is affiliated and endorsed by the following organizations:
