

Six Sigma Yellow belt

Course Outline

Program Overview

The Six Sigma Yellow Belt operates in support of or under the supervision of a Six Sigma Black Belt, analyzes and solves quality problems and is involved in quality improvement projects.

This 2-day program on Six Sigma Yellow Belt Certification will help you understand and implement six sigma improvement methodologies for internal process improvement through independent projects and support your black belts in large cross-functional projects leading to Organizational success. It will help you to lead and execute process level improvement initiatives, drive quantified success, achieve improved customer satisfaction through appropriate measurement and help the Organization achieve increased productivity & profits.

DMAIC methodology is used to maximize cost savings using Statistical Process Control.

The DMAIC (D-Define, M-Measure, A-Analyze, I- Identify, C-Control) methodology is presented with case studies and examples drawn from business processes.

Duration

2 – Day Program

Learning Objectives

Upon completion of this workshop you will understand:

- Gain comprehensive knowledge about six sigma and its applicability to operational areas
